# Ledger

PERSONAL FINANCE APP

Ipad application which assists users with tracking, projecting and managing personal finances. Our work was inspired by the old days when people would use a leather bound ledger to track finances/accounts.

This project at the moment is under development phase. However we've prepared fully clickable prototype in invision and you can test yourself.

# Ledger

Made for Ipad IOS platform.

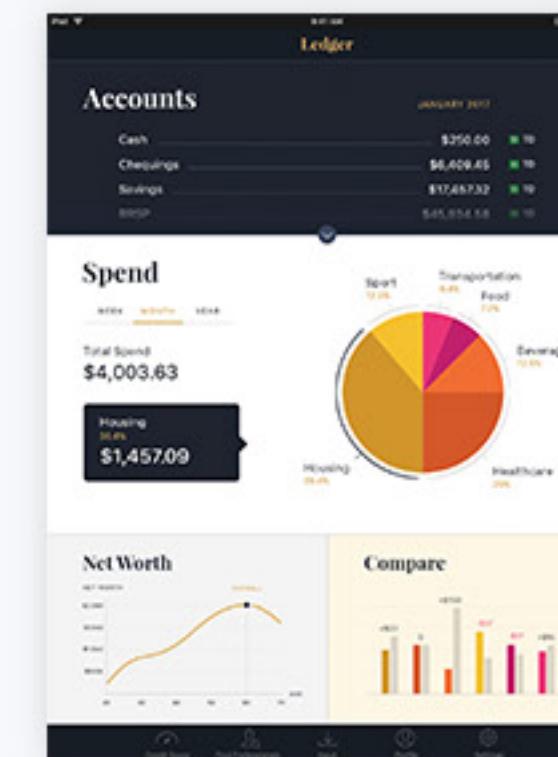

Total of 10 screens designed.

Total time spent on design – 76 hours.

# LEGGUP

We are working on the platform design for coaches and students. It has four main key roles. One is for coaches. Second is for learners. Third is for administrators and fourth - corporate/enterprise employees.

At the beginning we started to use Inspinia template. Then on the second iteration we realized that platform has to have more functions. In result we changed to custom design to create clean, intuitive and user-friendly service.

**Cycles:** 3 iteration cycles.

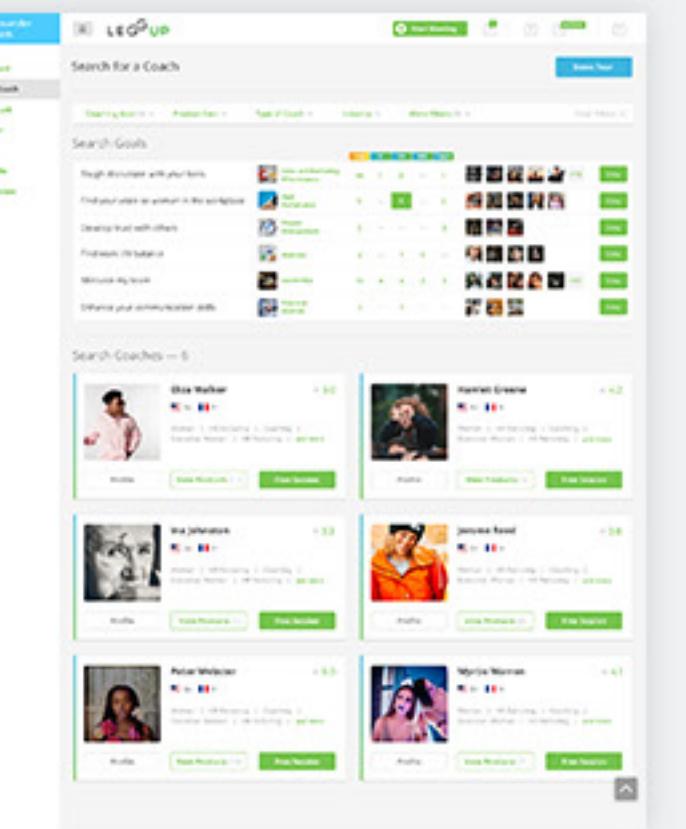

**Total time spent on design:** 700 hours.

Total of 100 screens designed.
